

# CURBSIDE VOTING

The following procedures are to be used to assist voters who find it difficult to enter the polling place facility:

- 1) Prior to 7:00 am, the Poll Deputy will post the following sign outside near the front entrance of the polling place:

“Voters who find the polling place inaccessible should see the Poll Deputy”

- 2) The Poll Deputy who is stationed near the front entrance of the polling place while the polls are open will watch for voters with mobility impairment, which may prevent them from gaining access to the voting area.
- 3) Upon determining that a voter is unable to enter the polling place and wishes to vote near the front entrance or in his or her vehicle, the Poll Deputy will ask the voter for an identification card with the voter's picture and signature and will present the identification to the Clerk or Assistant Clerk. If the voter does not have acceptable identification, the Poll Deputy will advise the Clerk or Assistant Clerk. The Clerk or Assistant Clerk will bring out a yellow “Ballot Table Affirmation” form, which will serve as the voter's identification when completed.
- 4) The Clerk or Assistant Clerk will then gather the following items:
  - Precinct register page containing the voter's name
  - Appropriate terminal and Activator (PEB) for the voter
  - An “Affirmation” form in case there are changes to the voter's registration.
  - A “Declaration to Secure Assistance” form in case the voter needs assistance to vote and there isn't a form already on file.
- 5) The Clerk or Assistant Clerk and one inspector will take these items out to the voter.
- 6) The voter will be asked, “What is your current address?” and the response will be compared with the address listed on the precinct register. If the address is different, the “Change of Address” procedures will be followed.
- 7) The voter will sign on the precinct register page.
- 8) The signature on the precinct register will be compared with the signature on the voter's identification. If the signature differs, a yellow “Ballot Table Affirmation” should be completed.
- 9) The terminal will be given to the voter. The voter must be provided with as much privacy as circumstances will permit when casting the ballot.
- 10) If the voter needs assistance to vote a “Declaration to Secure Assistance” must be filled out and signed by the voter.
- 11) The voter may then chose a person to assist them, or two election board members (preferably of different parties) may assist them.
